

# *Scorpio 17'*

*"a new three-section light weight telescopic crane"*

The NEW **Scorpio 17'** is a three section light telescopic crane for payloads until 60 Kg in under slung and 40 Kg in over slung.

**Servicevision** has designed the **Scorpio 17'** like a longer version of the **Scorpio 10'** to provide to film market the best crane for car shootings or interior sets.

The **Scorpio 17'** has a dolly/base with articulated arms that allows to change its with for standard dolly tracks of 62 cm and for 40 cm **Scorpio tracks**, it also allows a very small and compact configuration for taxing to go through standard office doorway (80 cm)... place your **Scorpio 17'** everywhere needed.

It also has a telescopic column that risers-up an extra 36 cm.

### **Features:**

Two different operation modes:

- Electronic:** Is a standard mode that allows telescopic electronic movement, powering the crane by batteries or power unit
- Manual:** is a new model that allows to create manual movements, where the operator will be able to move the telescopic by using the hands and the arm and the head will follow according keeping the horizon.

### **New generation of Levelling Head:**

- With real horizon
- Allows to create a manual movement on the arm, levelling the head to the horizon.
- Adjustable level offset, both manually and electronically.
- Over-slung and under-slung capability.

As every **Scorpio** telescopic crane, the new **17'** preserves the excellence of its bigger brothers
